

Nesrine ROUISSI *Data Science, BI & Artificial Intelligence*

Angers, France | +33 7 69 80 46 05 | rouissinesrine3@gmail.com |  Nesrine Rouissi |  nesrine26rouissi

Profile

Computer engineering student (ESPRIT) specializing in Data Science, in my final year through an exchange semester at ESEO Angers. I design **predictive modeling**, **Business Intelligence** and **generative AI** solutions that answer a concrete business need. Seeking a **6-month end-of-studies internship starting February 2027**.

Professional Experience

EY Tunisia (Ernst & Young), *Data Science Engineering Intern* | 06/2026 – 07/2026

- Designed the architecture of a virtual AI presenter (Express FM project): news collection, semantic deduplication, categorization, importance scoring, summarization, TV script generation, speech synthesis and animated avatar.
- Built a proof of concept for an AI assistant for Data Engineering and BI: automation of ETL flows, SQL scripts, DAX measures and Power Query code with generative AI (Claude, MCP); benchmark of manual vs. AI-assisted vs. MCP-assisted development.

Tools: Python, FastAPI, PostgreSQL, SQL Server, SSIS, Power BI, Claude/MCP

STB Bank, *Data / BI Analyst Intern* | 06/2025 – 07/2025

- Predictive optimization of cash flows and liquidity across bank branches, using real financial and banking data.
- Built predictive models (statistical analysis, dimensional modeling).

Tools: Python, statistical analysis, dimensional modeling

AVAXIA, *Intern (Final Year Project)* | 02/2024 – 05/2024

- Developed a Business Intelligence solution to monitor SAP systems.
- Dimensional modeling and ETL processes to feed the dashboards.

Tools: Power BI, DAX, Power Query, ETL

ELITINFO, *Intern* | 07/2023

- Introduction to SAGE BI Reporting features and configuration.

Projects

- Overfitted, AI e-commerce platform**: computer vision, NLP and generative AI; virtual try-on (diffusion model), personalized recommendations, content generation.
- Alzheimer's Disease, MLOps pipeline**: experiment tracking (MLflow), FastAPI prediction API, local containerization (Docker).
- TB-Detect**: Deep Learning, tuberculosis detection on chest X-rays, data augmentation (rotation, flip, noise).
- Breast Cancer Detection**: CRISP-DM, comparison of algorithms, classifier deployed through a simple interface.
- ALIA**: conversational AI assistant for the training of medical representatives.
- Hospital Dashboards**: Power BI, snowflake modeling, ETL, KPIs (satisfaction, occupancy, cost).
- HACK EL MAKEN Hackathon**: 1st prize, online booking platform for MAKAN site activities.

Skills

AI & Machine Learning: Machine Learning, Deep Learning (TensorFlow/Keras), NLP, generative AI, diffusion models, prompt engineering, Scikit-learn, XGBoost, CRISP-DM, statistical analysis

Programming: Python (pandas, NumPy), R, SQL, C++, JavaScript, PHP, HTML/CSS

Data & BI: Power BI, DAX, Power Query, ETL (SSIS), dimensional modeling

Databases: PostgreSQL, SQL Server, Oracle, MySQL, MongoDB

MLOps & tools: Git, Docker, MLflow, FastAPI, Claude/MCP, Node.js, Symfony, JavaFX, FlutterFlow

Education

Engineering degree in Computer Science, Data Science specialization | 2024 – 2027

ESPRIT, École Supérieure Privée d'Ingénierie et de Technologie (degree awarded after the final-year internship)

Exchange semester, DISA program – Biomedical track | 09/2026 – 02/2027

ESEO Angers

Bachelor's degree in Business Computing, Business Intelligence track | 2022 – 2024

ESEN, University of Manouba

Certifications

Applications of AI for Anomaly Detection; Fundamentals of Deep Learning

Languages and Activities

Languages: Arabic (native) | French (DELFI B2) | English (B2)

Activities: Treasurer of the ESEN Android Club; AIESEC University (IR & Data department, Middle Manager MoGX+TM)
