

Nadhmi ROUISSI

Second-year engineering student in Computer Science, specializing in Financial Computing & Engineering.

✉ rouissinadhmi11@gmail.com ☎ 24804454

📍 Résidence Ryma, Bloc B, Appartement B4, Ennasr 2, Ariana 📅 10/02/2004

🌐 Rouissi Nadhmi

📄 SUMMARY

Second-year engineering student with a strong passion for financial engineering, I am constantly seeking effective solutions to solve complex problems. Through academic projects, I have developed skills in design, modeling, and programming, as well as the ability to work collaboratively on technical challenges. I am highly motivated to learn and contribute to ambitious projects.

🧠 SKILLS

HTML/CSS/JavaScript PHP

SQL

C#

Devops & Cloud: Docker, Kubernetes, CI/CD pipelines, SonarQube, Prometheus, Grafana

JavaFX

Symfony

Angular

Spring-boot

Python

🌐 LANGUAGES

Arabic: Native

French: DELF B2

English: B2

📄 CERTIFICATES

Introduction to Data and Data Science 📄

📁 PROFESSIONAL EXPERIENCE

EXPRESS DISPLAY : 01/07/2023 – 31/07/2023

Focused on discovering the features and configuration of GLPI, including IT asset management, ticketing, system customization, and reporting capabilities. It aimed to provide practical knowledge of IT service management by using GLPI to organize, monitor, and optimize IT support processes.

STB BANK : 15/06/2025- 31/07/2025

Focused on supporting credit risk assessment through the analysis and preparation of banking data. The subject covered data preprocessing, financial ratio analysis, statistical modeling, and the development of reliable datasets to improve credit risk evaluation and decision-making.

Tools: Python (Pandas, NumPy), Excel, Statistical Analysis, Feature Engineering

🎓 EDUCATION

2021–2022: Baccalaureate in Technical Sciences

Ibn Rachik High School, Ezzahra

2022–2026: Second-year engineering student in Computer Science

Ecole Supérieure Privée d'Ingénierie et de Technologie

📁 PROJECTS

Repath is a desktop and web application that supports individuals with addiction through a personalized rehabilitation journey. It integrates medical, psychological, physical, and social support services into a unified platform, centralizing care and follow-up with a shared database.

Stack : Symfony, JavaFx , MySql

EQUA is a blockchain-based microfinance platform promoting financial inclusion through secure micro-loans, savings, and digital payments. Built with Angular and Spring Boot, it features secure authentication, wallet management, KYC, and financial workflows, following clean architecture and DevOps best practices.

Stack: Angular, Spring Boot, PostgreSQL, Spring Security (JWT/OAuth2), JPA/Hibernate, Docker, Git/GitHub, Swagger/OpenAPI.

Ethereum Address Risk Detection is a machine learning project that classifies Ethereum address risk using transaction data. It includes data preprocessing, PCA, SMOTE for imbalance handling, and comparative evaluation of models such as Random Forest, XGBoost, SVM, and ANN.

Stack : Python, Pandas, NumPy, scikit-learn, imbalanced-learn, Matplotlib, Seaborn.

INTERESTS

Weight training, Football, Swimming
Volunteering and community involvement
Sports cars

ORGANISATIONS

2021–2022: General Member of the Interact Club: “Least Active Recruit” Certificate

2025-2026: Founder of the Tunipreneurs Club at ESPRIT
